

How was research funding from NCRI Partners spent in 2015?

Over **£498m** was funded by 18 **NCRI Partners** and captured in the NCRI Cancer Research Database (CaRD) in **2015**

This is the **seventh consecutive year** that the level of research funding has been around the **£500m** mark

www.ncri.org.uk/card

How is the money spent?

Spend by research type

Once again **biology and treatment** make up around **two thirds of the total research spend**.

Funding of **Treatment research** has **increased** steadily over the last **three years** and **aetiology** has **increased** for the first time since **2011**.

Data are for 2015 and are rounded to the nearest whole number

Spend by cancer site

Approximately **51%** of the NCRI Partner spend went on **non-site specific research***.

Of the remaining site specific spend, the **top 5 cancer sites** were **breast cancer, leukaemia, colon and rectal cancer, lung cancer** and **prostate cancer**. These made up about **60%** of the site specific research, which is consistent with all previous years of data collection since **2009**.

*research that is relevant to all cancers

NCRI Partners in 2015 who submitted data to NCRI Cancer Research Database (CaRD)

NCRI CaRD aims to record spend on cancer research and spend that directly supports and enables cancer research annually.
