NCRI newsletter

Welcome to our latest newsletter (October 2015)

The NCRI Cancer Conference is nearly here - if you're joining us in Liverpool from 1 November there are plenty of exciting sessions to attend - find out about some of this year's special features in this newsletter. If you haven't yet booked your place and still want to attend then check out the programme at conference.ncri.org.uk, you can still register at the venue on the day. In addition, the NCRI team and some of our experts involved in NCRI activities will be joining us on the NCRI stand in the Exhibition Hall throughout the Conference, so be sure to come along to stand 48 to say hello and find out more about our other areas of work.

As well as Conference highlights, we have a round-up of news from our collaborative initiatives and the UK cancer research community; read on for more.

Best wishes
The NCRI team

Follow the latest conversations from the NCRI Cancer Conference and find out what's going on at the NCRI stand in the Exhibition Hall throughout the Conference.

Updates across NCRI activities

Now live: NCRI interactive portfolio maps

The NCRI Clinical Studies Groups (CSG) portfolio maps are a visual representation of the clinical

cancer research landscape, highlighting areas of clinical cancer research that are currently well represented in the national portfolio, and where there are any gaps. They are now available to view through a new interactive platform.

Imaging: report on the work of the NCRI PET Core Lab

The NCRI PET Core Lab provides quality control expertise to support researchers using PET in multicentre trials. The development of this activity was supported by a subset of NCRI Partners, and has now moved to a new home within the ECMC network where it continues its work. The report explains how the PET Core Lab works and summarises the Core Lab team's achievements over the past three years.

Biobanking: registration now open for NCRI CCB's winter meeting

NCRI's Confederation of Cancer Biobanks (CCB) presents a meeting on 'Informed consent in a digital age' on Friday 11 December 2015 at the International Centre for Life, Newcastle. The meeting will explore the meaning and importance of informed consent for the use of tissue samples in research from the perspective of the donor, regulator and scientist and explore new ways in which consent may be obtained using online techniques.

The International Cancer Benchmarking Partnership - seeking expert opinion

The International Cancer Benchmarking Partnership (ICBP) is a global partnership of clinicians, academics, data experts and policymakers seeking to understand how cancer survival varies between high-income countries and what could be driving these differences. The ICBP has developed a short online survey and is seeking expert opinions from clinicians, academics, data experts, patient representatives and policymakers in all ICBP jurisdictions to help to refine and prioritise new research questions.

Reports, publications and resources

Report on the National Prevention Research Initiative

A report on the National Prevention Research Initiative (NPRI; an initiative set up in 2004 by a subset of NCRI Partners and other research funders working beyond cancer) was recently published by the Medical Research Council. It shines a light on how we can take a fresh approach to preventing ill health.
