# NCRI Newsletter

Dear Colleague,

Our [Living With and Beyond Cancer survey](#) is still open, seeking the opinions of patients, the people who look after or have looked after them, and the professionals who work with them on the questions research should be asking in this area. [Ceinwen Giles, a young mother who is living beyond cancer](#), tells us about the importance of more research in Living With and Beyond Cancer.

Our flagship initiative, CTRad, has made some great progress over the past three years and has a new strategic vision to help it to achieve even more over the next three. [Read more about the initiative and the difference it's making in this blog post](#).

You can also [submit your proposal](#) for the NCRI Consumer Forum's Dragon's Den event at the NCRI Cancer Conference.

We also share updates from other areas relating to cancer research, and the latest events and opportunities.

The NCRI Team

## NCRI updates

### Why our Living With and Beyond Cancer initiative matters - Ceinwen's

#### story

Ceinwen Giles was diagnosed with cancer in her thirties and, like many people, continues to live with the consequences. Ceinwen is a patient representative on the steering group for our Living With and Beyond Cancer initiative. In this blog post, she shares her story, highlighting why a project like this is so important.

[>>Read Ceinwen's story here](#)

### Living With and Beyond Cancer - help us to share the survey

Our Living With and Beyond Cancer survey is still open. We're asking patients, people who look after them or have looked after them, and professionals for their opinions on the most important questions for research in this area. Please share the survey with your communities and encourage as many people as possible to share their views.

[>> Please share our Living With and Beyond Cancer survey](#)

## CTRad: progress to date and ambitions beyond 2016

NCRI's flagship initiative, the Clinical and Translational Radiotherapy Research Working Group (CTRad), reports on its excellent progress over the past three years and ambitions for the next three.

[>>Read our blog on the progress and future ambitions of CTRad](#)

## Submit your proposal for the NCRI Consumer Forum's Dragon's Den event

At the NCRI Cancer Conference in November 2017, we'll be hosting a 'Dragon's Den' session to bring researchers and our Consumers together. If you would like to apply to get Consumer advice and discussion on your research, please submit an application now.

## Conference news

### Only three weeks left to register for the 2017 NCRI Cancer Conference!

Are you looking to discover the latest advances in cancer research? The NCRI Cancer Conference provides the perfect platform for researchers, clinicians, people affected by cancer and industry representatives to showcase and discuss high-quality research. Informative and interactive educational sessions will ensure you're up-to-date with new insights and developments, and create the ideal setting for you to establish new collaborations with key stakeholders in cancer research. But make sure you're quick - registration closes on 22 October 2017!

[>>Register today](#)

## Upcoming events and opportunities

### Register now for the NCRI Children's Cancer & Leukaemia CSG Annual Trials Meeting, 14 November 2017

After the success of the 2016 meeting, the NCRI Children's Cancer & Leukaemia CSG is delighted to announce that the 2017 Annual Trials Meeting will be held on 14 November 2017 at the Cavendish Conference Centre, London.

The aims of the meeting are: the promotion of current NCRI trials; the dissemination of the results of closed trials; to discuss and engender collaboration in the development of future national trials; to provide networking opportunities across disciplines and between researchers and pharmaceutical company representatives; to provide continuing professional development.

Registration for this meeting is now open.

## UK Clinical Research Collaboration Tissue Directory

Find out about the latest developments in UK-based biobanking. Hear from experts about the patient perspective, small and medium-sized enterprises, research ethics and quality standards. Delegates will also hear how the work of biobanks can be better recognised.

The event will be a unique chance to hear about and shape the future of the UKCRC Tissue Directory and Coordination Centre.

[>>Click here for more information and to register](#)

## Discover cancer research in Wales

Come along to two free events in November to discover how organisations in Wales are working together to beat cancer.

The Wales Cancer Partnership presents the Wales Cancer Conference (23 - 24 November 2017) and a public event, Tackling Cancer Together (25 November 2017) to showcase the cancer care and research happening in Wales, with over a dozen organisations sharing their research at both events.

[>>Click here to register for the Wales Cancer Conference](#)

[>>Click here to register for Tackling Cancer Together](#)

## Cancer Research UK's Lung Cancer Centre of Excellence Conference 2017

There is still time to secure your space for the Cancer Research UK's Lung Cancer Centre of Excellence Conference 2017 on 3 - 5 December 2017.

Join to hear from Professors Mark Krasnow, Tyler Jacks, Harry de Koning and Julien Sage as keynote speakers, and a packed agenda of scientific talks and presentations that will explore: clinical trials; discovery science and target identification; radiotherapy and radiobiology; early detection and pre-invasive disease; biomarker and imaging; and tumour evolution and heterogeneity.

Spaces are limited.
